ABOUT EZG.

EZG Manufacturing started as EZ Grout and was born from the desire of one man to improve the quality of equipment used in masonry. In 1998, founder and CEO Damian Lang sought to help contractors increase efficiency and profitability with American made products built from hands-on experience. Masonry equipment available at the time lacked sturdiness and reliability, causing operators to experience systemic machine clogs and mechanical failures. Damian developed the first Grout Hog® after numerous prototypes. Over time, he perfected models by patenting new features specific only to the EZ Grout line, like clog-prevention mechanisms and an innovative delivery system.

Once Damian's invention proved useful, he turned his creative focus to other areas of construction and masonry, eventually releasing the Mud Hog®, Uphill Grout Hog®, Hog Slopper®, Hog Leg®, Hog Trough® and Booger Hog®. In the early 2000's the company successfully expanded it's reach to other contract industries like fence and hardscape that would also benefit from better, safer, smarter products on every job-site.

Damian continues to expand EZG's services and has become a leading industry voice. As an author he also shares what he's learned after a lifetime of experience in his book R.A.C.E. - Rewarding and Challenging Employees: For Profits in Masonry. Damian's column, "Contractor Tip of the Month," can be found as a feature in multiple major industry magazines. He also regularly offers seminars and consultations for masonry and construction organizations all over the country.
