Fencing Equipment
Developed with the assistance of Professional Fence Builders, the patented Fence Hog unit was designed to satisfy customer request for a machine that picks up and dispenses cumbersome rolls of chain link fence easily with no physical effort.

Powered by hydraulics of the skid-steer Loader, the uniquely designed cage mechanism opens and tilts to retrieve the roll of fence from the ground. For the Fence Contractor, this means no more unrolling fence by hand and using extra laborers to stand it up. With the standard features of the Fence Hog, this machine allows optimum efficiency for the fence contractor to install fence quickly, easily, and professionally using only two people.
Model FH08-36
- Holds up to 36" diameter roll
- Standard cage height is 8 ft.
- Capacity: 100 ft. chain-link, 330 ft. woven wire
- Attaches directly to skid steer loader with universal attachment plate
- Drive forward arm can be positioned on either side of unit to dispense material from right or left
- Choice of chain link or woven wire stretcher bar included
- Optional 2 ft. and 4 ft. extension
- Optional Tilt swivel for uneven terrain
- Works with various fencing material such as chain-link, woven wire, vinyl coated fabric, snow fence, etc.

Model FH08-24
- Holds up to 24" diameter roll
- Standard cage height is 8 ft.
- Capacity: 50 ft. chain-link, 330 ft. woven wire
- Attaches directly to skid steer loader with universal attachment plate
- Drive forward arm can be positioned on either side of unit to dispense material from right or left
- Choice of chain-link or woven wire stretcher bar included
- Optional 2 ft. and 4 ft. extension
- Optional Tilt swivel for uneven terrain
- Works with various fencing material such as chain-link, woven wire, vinyl coated fabric, snow fence, etc.

Model FHW
- Holds up to 22" diameter roll
- Standard cage height is 6 ft.
- Capacity: 50 ft. chain-link, 330 ft. woven wire
- Attaches directly to mini skid steer loader or walk behind
- Rotating turntable to smoothly dispense fabric

The Fence Hog's "Tilt" swivel option for uneven terrain.
CUSTOMER REVIEWS

★★★★★ FENCE HOG®

Jason Riggins, R & S Fence

“The Fence Hog saves us a lot of time and cuts down on manpower. Our projects used to take three men and now we only need two, or sometimes even one. The Fence Hog has definitely helped us become more competitive in the commercial market because jobs that used to take us three days now only take us one. Our jobs run a lot smoother and faster by using the Fence Hog.”

Travis Ray, Hornet Fence LLC.

“We purchased the Fence Hog FH08-24 with the 4 ft. extension to stretch some 10ft., 12 ft., and 14ft. high chain-link for a detention center project. The time and money we saved in labor alone paid for the unit on the first job! The Fence Hog is a very well made piece of equipment that is efficient and easy to use. I highly recommend the Fence Hog to anyone in the fence construction industry!”
After several requests from fence contractors, EZG Manufacturing adds to its line of quality fence products with the Mobile Mud Hog to thoroughly and quickly mix materials and deliver those materials directly to the post-hole. The Mobile Mud Hog comes standard-equipped with six patented rubber blades that wipe the sides of the drum and continually roll the mix to the center of the drum to allow for the best mixing process.

With the Mobile Mud Hog, the contractor simply adds water and materials, starts the paddle rotation, and mixes. The skid steer operator simply drives along the fence line or pouring area while the material continues to mix as it is dispensed through the side discharge snout. The Mobile Mud Hog mixes and dispenses quickly. In fact, Matt Thompson of Fence Solutions, Lancaster, Ohio, stated, “We filled 80 post holes in 30 minutes!”

The hydraulic powered Mobile Mud Hog comes standard with skid steer attachment plates and forklift pockets to allow even more versatility. Or, units can be built to the contractor’s specifications. With load capacities of up to 3/4 yards, the Mobile Mud Hog improves your job site efficiency.
Model MMH12
- 12 cu. ft. (.34 m³) Capacity
- Triple use: Concrete, Grout, and Mortar
- Will mix up to 3/4" (1.9 cm) aggregate
- Easy to load - Move the mixer to where the materials are
- Hydraulic dump gate
- Unload right where the material is needed - No unnecessary steps
- Unloads up to 1/2 cubic yard in 1 minute
- Universal skid steer plate
- Powered by auxiliary hydraulics on either a skid steer loader or forklift

Model MMH20
- 20 cu. ft. (.57 m³) Capacity
- Triple use: Concrete, Grout, and Mortar
- Will mix up to 3/4" (1.9 cm) aggregate
- Easy to load - Move the mixer to where the materials are
- Hydraulic dump gate
- Unload right where the material is needed - No unnecessary steps
- Unloads up to 1/2 cubic yard in 1 minute
- Universal skid steer plate
- Powered by auxiliary hydraulics on either a skid steer loader or forklift

Model MMH4 & MMH9
- Triple use: Concrete, Grout, and Mortar
- Mixing paddles powered by hydraulics
- Manual slide gate for dispensing aggregate
- Will mix up to 3/4" (1.9 cm) aggregate
- MMH4 attaches directly to walk behind
- MMH9 attaches directly to mini or full size loader with additional attachment plates
**CUSTOMER REVIEWS**

★★★★★ MOBILE MUD HOG®

**John Roop, Capital Fence**

“We own two MMH’s and they are a huge time saver and safer for my employees to use. I will be planning to buy another one in the future.”

**Scott Montague, Outlaw Fencing LLC.**

“I have had my MMH20 for seven years and I absolutely love it. I only need two workers to pour concrete when before I needed three or four. The manpower the MMH20 saves you is well worth the cost of having the MMH20 as part of your equipment line.”

**Model BWH**

- Attaches with a universal attachment plate or fork pockets
- Compact for easy transport
- Designed to dispense three strands of barbwire
- Hydraulic arm adjustment
- Pivoting arm allows barbwire to be dispensed from both sides of the fence
- Optional high tensile wire attachment for top or bottom wire
- Utilize your entire roll of barbwire
- Hog Stringer sold separately

**Mike Babcock, Babcock Fence Company**

“I went up to the EZG Manufacturing plant and tested the Barbwire Hog to see what it could really do. My crew and I used the Barbwire Hog to stretch about 1,100’ of 3 strand barb wire on top of 7’ chain link fence. It took my crew about a tenth of the time than what it usually would by hand. The Barbwire Hog saves my company so much time and energy. I would recommend it to anyone that is in the fencing industry. EZG has really come up yet another beneficial product for fencing companies.”
FENCER'S CEMENT HOG®

Model FCH50 & FCH100

- Use with a skid steer loader or small forklift
- 1/2 and 1 cubic yard capacities
- Hooks to auxiliary hydraulics on your loader or forklift; delivers up to 1” aggregate
- Unloads one-half cubic yard in 2 minutes
- Delivers wet or dry materials — even dry sand
- 10” discharge tube with 7 1/2” auger

Nick Cacciola, Overland Contracting

“We recently purchased two Cement Hogs to try out on a solar project in North Carolina where subsurface conditions made it necessary to embed the piers in concrete. The Cement Hogs made it possible to reach all areas of the site, most of which was inaccessible by concrete trucks, while significantly increasing our productivity and alleviating much of the risk associated with the site conditions. Versatility, ease of use, and low maintenance are all key features that have made the Cement Hog a positive addition to our equipment fleet.”
How it Works

The Stretch-N-Go Hog holds the fabric upright and guides the material along the fence line. Coated tension rolls protect wire during dispensing while adjustable brake system provides individual tension preferences. Fence can nailed directly behind the skid steer, making for faster, more efficient work. The Stretch-N-Go Hog features for pockets on both sides to allow the operator to easily switch from side to side.

Chad Meagher, Coast 2 Coast Fencing Inc.

“I would not be able to do the square footage I do, in the time I do it, without the Stretch-N-Go. I had three employees put up 3,300 lf. of five strand barbwire in 13.5 hours. I had the same three employees put up 9,100 lf. of five strand barbwire in 5.5 hours and 18,400 lf. of six strand barbwire in 8 hours and five minutes. I wish I would have purchased the Stretch-N-Go sooner because it has already saved me so much money.”

The optional SNGBarb mounts to the Stretch-N-Go Hog™, allowing six rolls of barbwire to be dispensed and tensioned concurrently.

STRETCH - N - GO HOG®

Model SNG4

- Tensions wire as it dispenses
- Weighs 1210 lb. (549 kg)
- Max. gross weight: 5,210 lb. (2363 kg)
- Capacity: 4 rolls of 330 ft. or 2 rolls of 660 ft. of wire
- Load with skid-steer
- Adjustable braking system for desired tension
- Optional barbwire attachment (up to 6 rolls)
- A 6ft. model is available
- Dimensions (L × W × H) 48" × 86" × 66"
THE BEGINNING OF EZG
EZG started as EZ Grout and was born from the desire of one man to improve the quality of equipment used in masonry. In 1988 founder and CEO Damian Lang sought to help contractors increase efficiency and profitability with American made products built from hands-on experience. Masonry equipment available at the time lacked sturdiness and reliability, causing operators to experience systemic machine clogs and mechanical failures.
Damian developed the first Grout Hog® after numerous prototypes. Over time, he perfected models by patenting new features specific only to the EZ Grout line, like clog-prevention mechanisms and an innovative delivery system.

SUCCESSFUL EXPANSION
Once Damian's invention proved useful, he turned his creative focus to other areas of construction and masonry, eventually releasing Mud Hog®, Uphill Grout Hog®, Hog Slopper®, Hog Leg®, Hog Trough® and Booger Hog®. In the early 2000's Damian introduced his Fence Hog® which now includes several models for the fencing industry. This automated fence installation equipment is well-known for saving construction crews hundreds of hours on large projects on virtually any terrain.

EZG MANUFACTURING
EZG's reputation as an industry leader in masonry, fencing and construction markets grew and soon its products were found on construction sites all over the globe. As Damian and his team learned more about the industry, they began to develop custom solutions for specific contracting problems. This led to the formation of EZG Manufacturing, which offers an extensive range of services from laser cutting to machining and powder coat painting.

EZG TODAY
Damian continues to expand EZG's services and is quickly becoming a leading industry voice. As an author Damian also shares what he's learned after a lifetime of experience in his book R.A.C.E. - Rewarding and Challenging Employees: For Profits in Masonry. Damian's column, "Contractor Tip of the Month," is featured in multiple major industry magazines. He also regularly offers seminars and consultations for masonry and construction organizations all over the country.
